

Protein Snack for Rodents

Valuable protein source from gently dried insects

- ✓ extremely healthy treat
- ✓ from high-quality insects only
- ✓ for hamsters and small, mouse-like rodents

In addition to herbal nutrition, hamsters, mice and other small rodents also require proteins of animal origin. These serve to renew the cells and the tissue and strengthen the animals' defences. The *Protein Snack* consists of gently dried grasshoppers, silkworm pupae and mealworms. It is a special treat and an ideal complement to the daily feed for hamsters and other small, mouse-like rodents (e.g. mice, rats, lemmings).

Feeding recommendations:

The *Protein Snack* is suitable as feed year-round. It should be provided as a complement to a balanced diet. Add approx. 1 teaspoon of insects to the main feed 3-4 times a week.

Ingredients:

Insects (grasshoppers, mealworms, silkworm pupae)

Complementary feed for rodents:

Analysis:

Crude Protein	50%	Crude Fibre	3%
Crude Fat	30%	Crude Ash	4%

Packages:

75 g Code 2341

Shelf life:

At least 12 months from date of manufacture. Keep well sealed after opening and store in a cool, dry place.
